### Equestrian Western Australia 2024 Replacement of Certificate of Registration Application

### <u>Markings</u>

White markings, whorls and scars are the only markings to be recorded on EA registration certificates (plus brands/microchip details).

Black markings i.e. the black legs of a bay horse do not count as identifying markings.

White Head Markings: Here are some common examples and how you would describe them.

#### White Leg Markings

CONJOINED = CONJ

NE/

EA Staff need to be very specific as to the location of white markings on the legs when describing them on the database. However, as there is limited spaces available in the database fields, abbreviations sometimes need to be used. Refer to the below guide as to standard practice.

EAR FORE = N/F	OFF FORE = O/F	NEAR HIND = N/H	OFF HIND = O/H	CORONET=C/NET
ASTERN = P/TERN	FETLOCK = F/LOCK	CANNON = C/NON	KNEE = KNEE	HOCK=HOCK

White leg markings must be shown as they appear when viewed from both sides of the horse. If a white marking extends right around the leg so as to be visible from both sides it must be drawn on both near side and off side diagrams.

Here is an example of how you would describe the white markings and a scar on the diagram at the left.

NEARFORE: White to fetlock, extending higher behind to cannon

NEAR HIND White to pastern

**OFF HIND**: Scar above hock on inside of leg

#### Other Markings - Scars

The position of scars, accidental or otherwise **MUST be marked** on the diagrams using an 'x'.

#### **Other Markings - Whorls**

The position of whorls **MUST be marked** on the diagrams using an 'O'.

#### Pinto, Paint & Appaloosa Horses.-

Members who submit an application to register a horse with excessive markings i.e. pinto, paint or appaloosa, **must include 3 clear photographs (by two sets)** with the application taken of the front of the horse (showing its head and front leg markings) and from the near side and off side. EA Office staff will then staple one set of photos to the registration certificate and one set to the original application. An EA stamp will be placed on the back of the photos that are stapled to the registration certificate to ensure that they are never altered.

Brands - Note: All new Registrations from July 1 2008 must have a microchip implant before it can be accepted.

Branding (OPTIONAL except in WA)) can either be freeze brand or hot brand and need only be on one side of the horse. It does not matter what the brand is. Brands are drawn onto the diagrams of the registration certificate as well as recorded in words. Some common description of brands use the words:

**Conjoined** = when two characters are touching **Over** = when one character sits over the other **Script** = used to describe a cursive or fancy letter

Lazy = when a letter or number is on its side Running = used to describe a character that's slightly on its side (like *italic* text)

Here are some examples of brands and how you would describe them in words.

Department of Local Government, Sport and Cultural Industries
